Custom Form & Map Designer
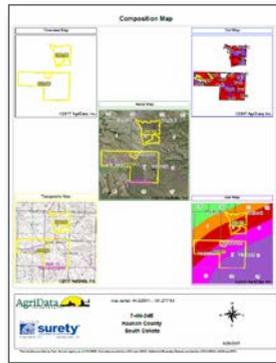

The primary component is the map(s) image(s) and information that will auto fill for you. You can choose to have it to be non-savable or *savable type. Assign a Geometry type.
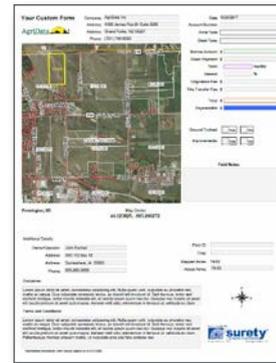

Include one or more maps to be paired with objects such as drop downs, text boxes, text areas. Also include formulas, scripting and variables. Forms are geometry specific.

Potentiality

Envision : Maps and Forms that conform to your needs and wants.

Conceptualize

Picture seeing it geographically.

Design

Be artfully creative.

Prototype

Build it. Test it in your Surety® Pro account. Surety® Admins can submit a request for us to build one for you. A quoted fee may be accessed for the service of us building it for you.

Digitize

Implement it for your entire company, a location or a specific client.

Pop-up Form

Used for inputting information and then having the ability to visually see the data on the mapping interface. Designate to be used with lines, points, or polygons.

* Saving into the system can only be completed in Surety® Pro

Mainstays

- !Forms Designer. is available to Surety® Pro Admins
- +"(" Surety® Pro Admins can Submit a Request for Service from Us ")"
- ++ "(" + Surety Admins can Submit a Request Service for a Custom Form/Map +")"
- Make Form or Map Geometry Specific: Line,Point, Polygon

Objects

- An "object" can be a label, text box, check box, radio button, legends, barcodes, map, image.
- "Objects" have properties that you can adjust to your liking: i.e. width.height.font.size.background color are a few properties.

Variables

- =@A Variable Will Auto Fill the Object (ex. Label) with Specified Information.
- =@Availability: There is a Plethora of Variables Readily Available to Use.

Formulas

- =Used to *(Perform a Calculation) Among Two or More Fields

Scripting

- Scripting is Used for When You Want an Action Performed. Example of Actions could be Hide/Show Fields if Other Supporting Criterion has been Met
- else {Auto Email Once Certain Criterion has been Met} elseif {Enable/Disable Fields is Another}

Custom Layer Styling

- In Surety® Pro, upon Saving a Custom Form or Map, it will become a Custom Layer as well, of which You will then be able to choose What & How Information is Displayed on the Mapping Interface.
